

# APPENDIX H. MITIGATION CATALOG

This appendix includes the mitigation catalog developed with input from the Tompkins County Steering Committee.

DRAFT

## DISEASE OUTBREAK

### Personal Scale

- **Manipulate the Hazard:**
  - None
- **Reduce exposure to the hazard:**
  - Proper hygiene
  - PPE
  - Social distancing
- **Reduce vulnerability to the hazard:**
  - Focus on personal health
- **Increase Capability**
  - Storage of PPE
  - Storage of supplies and food to reduce need to enter public spaces

### Corporate Scale

- **Manipulate the Hazard:**
  - None
- **Reduce exposure to the hazard:**
  - PPE
  - Social distancing
- **Reduce vulnerability to the hazard:**
  - Distanced work environment
  - Regular cleaning of work environment
- **Increase Capability:**
  - Storage of PPE
  - Equipment for monitoring
  - Trainings for staff

### Government Scale

- **Manipulate the Hazard:**
  - None
- **Reduce exposure to the hazard:**
  - PPE
  - Social distancing
- **Reduce vulnerability to the hazard:**
  - Distanced work environment
  - Regular cleaning of work environment
  - Designate testing site/ quarantine facility
  - Establish mutual aid agreement for emergency services.
- **Increase Capability:**
  - Storage of PPE
  - Equipment for monitoring/treatment
  - Trainings for staff
  - Public outreach

DRAFT

## DROUGHT

### Personal Scale

- **Manipulate the Hazard:**
  - None
- **Reduce exposure to the Hazard:**
  - Consider stored water/captured water techniques during dry seasons.
  - Establishing an irrigation time/scheduling program or process so that all agricultural land gets the required amount of water. Through incremental timing, each area is irrigated at different times so that all water is not consumed at the same time. Spacing usage may also help with recharge of groundwater.
- **Reduce vulnerability to the Hazard:**
  - Drought resistant landscapes
  - Reduce water system losses
  - Regularly check for leaks to minimize water supply losses
  - Install low-flow water saving showerheads and toilets
  - Turn water flow off while brushing teeth or during other cleaning activities
  - Adjust sprinklers to water the lawn and not the sidewalk or street.
  - Run the dishwasher and washing machine only when they are full.
  - Check for leaks in plumping or dripping faucets.
  - Install rain-capturing devices for irrigation.
  - Install graywater systems in homes to encourage water reuse.
  - Rotate crops by growing a series of different types of crops on the same fields every season to reduce soil erosion.
  - Planting “cover crops,” such as oats, wheat, and buckwheat, to prevent soil erosion.
  - Practicing contour farming by farming along elevation contour lines to slow water runoff during rainstorms and prevent soil erosion, allowing the water time to absorb into the soil.
  - Using terracing on hilly or mountainous terrain to decrease soil erosion and surface runoff
  - Using zero and reduced tillage to minimize soil disturbance and leave crop residue on the ground to prevent soil erosion.

### Corporate Scale

- **Manipulate the Hazard:**
  - Increase green space and decrease the amount of blacktop parking lot.
- **Reduce exposure to the Hazard:**
  - Consider stored water/captured water techniques during dry seasons.
- **Reduce vulnerability to the Hazard:**
  - Drought resistant landscapes
  - Reduce private water system losses
  - Identify alternate water supply sources.
  - Install low-flow water saving toilets
  - Adjust sprinklers to water the lawn and not the sidewalk or street.
- **Increase Capability:**
  - Practice active water conservation
  - Develop a COOP
  - Create a water conservation plan.
  - Preserve economic stability during a drought by encouraging agricultural interests to obtain crop insurance to cover potential losses due to drought

### Government Scale

- **Manipulate the Hazard:**
  - Ground Water Recharge through stormwater management
  - Implement cloud seeding techniques during dry seasons.
- **Reduce exposure to the Hazard:**
  - Identify and create ground water back up sources.
  - Create /identify new impounded water supply points.
  - Developing new or upgrading existing water delivery systems to eliminate breaks and leaks.
- **Reduce vulnerability to the Hazard:**
  - Water use conflict regulations
  - Reduce water system losses
  - Distribute water saving kits
  - Identify sites ideally suited for ground water recharge.
  - Implement stormwater retention in regions ideally suited for groundwater recharges.
  - Utilize drought resistant landscapes on community owned facilities.
  - Encourage citizens to take water-saving measures
- **Increase Capability:**
  - Public education on drought resistance
  - Identify alternative water supplies for time of drought. Mutual aid agreements with alternative suppliers.
  - Develop a drought contingency plan
  - Develop criteria-“triggers” for drought related actions
  - Improve accuracy of water supply forecasts
  - Provide incentives to influence active water conservation techniques such as water user rate reductions.
  - Establish protocol for salt water de-salinization to be implemented during conditions of severe drought.
  - Consider providing incentives to property owners that utilize drought resistant landscapes in the design of their homes.
  - Use of water buffalo tankers

**DROUGHT**

**Personal Scale**

**Corporate Scale**

**Government Scale**

- Constructing windbreaks to prevent evaporation from reclaiming salt-affected soil.
- Collecting rainwater and using natural runoff to water plants.
- **Increase Capability:**
  - Practice active water conservation techniques.
  - Seek ways to operate wells in such a way to enhance their functional longevity and supply capability.

- Promote well usage techniques that strive to enhance functional longevity and supply capability of private water supply wells.
- Develop an ordinance to restrict the use of public water resources for non-essential usage, such as landscaping, washing cars, filling swimming pools, etc.

DRAFT

## EXTREME TEMPERATURES

### Personal Scale

- **Manipulate the Hazard:**
  - None
- **Reduce exposure to the hazard:**
  - Insulate structure
  - Provide redundant power.
  - Plant appropriate trees near home ("Right tree, right place" National Arbor Day Foundation Program).
- **Reduce vulnerability to the hazard:**
  - Air condition non-conditioned buildings.
  - Install backup heat (e.g. wood burning stoves)
  - Incorporate "green building" methods (e.g. green roofs)
- **Increase Capability**
  - Be aware of impending heat waves.
  - Inform yourself on the do's and don'ts during heat waves.
  - Have fans available for use during peak demands in leu of air conditioning.
  - Install back-up generators

Know the location of cooling and warming shelters

### Corporate Scale

- **Manipulate the Hazard:**
  - None
- **Reduce exposure to the hazard:**
  - Create redundancy to power supply to deal with power grid vulnerability during high demands
- **Reduce vulnerability to the hazard:**
  - Air condition non-conditioned buildings.
  - Incorporate "green building" methods (e.g. green roofs)
- **Increase Capability:**
  - Inform employees of the seriousness of heat waves.
  - Monitor weather forecasts.

Establish a COOP.

### Government Scale

- **Manipulate the Hazard:**
  - None
- **Reduce exposure to the hazard:**
  - Create redundancy to power supply to deal with power grid vulnerability during high demands
- **Reduce vulnerability to the hazard:**
  - Air condition public buildings.
  - Incorporate "green building" methods (e.g. green roofs)
- **Increase Capability:**
  - Inform the public on the seriousness of heat-waves
  - Identify populations vulnerable to extreme heat (elderly, poor) for early warning during potential heat waves.
  - Enhance weather forecasting capability
  - Distribute fans to vulnerable populations.

Promote selective approaches to cooling your residences and businesses during peak demands.

## FLOOD

### Personal Scale

- **Manipulate the Hazard:**
  - Clear stormwater drains and culverts
- **Reduce exposure to the Hazard:**
  - Locate or re-locate outside of Hazard area
  - Institute low impact development techniques on property
- **Reduce vulnerability to the Hazard:**
  - Retrofit existing structures and utilities above Base Flood Elevation (BFE)
  - Floodproof existing structures (wet- or dry floodproofing).
  - Store Hazardous materials above BFE or outside of flood-prone areas
- **Increase Capability:**
  - Develop household mitigation plan, such as retrofit savings, communication capability with outside, 72-hr. self-sufficiency during and after an event
  - Buy flood insurance

### Corporate Scale

- **Manipulate the Hazard:**
  - Clear stormwater drains and culverts
- **Reduce exposure to the Hazard:**
  - Locate business critical facilities or functions outside Hazard area
  - Institute low impact development techniques on property
- **Reduce vulnerability to the Hazard:**
  - Build redundancy for critical functions/ retrofit critical buildings.
  - Provide flood-proofing measures when new critical infrastructure must be located in floodplains.
  - Harden structures and infrastructure (wet and dry-floodproofing)
  - Store Hazardous materials above BFE or outside of flood-prone areas
- **Increase Capability:**
  - Increase capability by having cash reserves for reconstruction
  - Develop and adopt a Continuity of Operations Plan (COOP)
  - Solicit "cost-sharing" through partnerships with private sector stakeholders on projects with multiple benefits.
  - Dam owner/operators should continue to be aware of and understand dam inspection and reporting requirements.
  - Ensure that all dam EAP's are kept in compliance with NYSDEC Regulations.

### Government Scale

- **Manipulate the Hazard:**
  - Clear stormwater drains and culverts
  - Dredging, levee construction, providing retention areas...
  - Structural flood control: levee's, dams, channelization, revetments.
  - Construct regional stormwater control facilities
  - Lead and develop a county-wide stream clearing strategy including the development of thresholds for response/action.
- **Reduce exposure to the Hazard:**
  - Locate/re-locate critical facilities outside of Hazard area
  - Acquire or relocate identified repetitive loss properties.
  - Promote open space uses in identified high Hazard areas via techniques such as: easements, setbacks, greenways, sensitive area tracks.
  - Adopt land development criteria such as density transfers, clustering
  - Institute low impact development techniques on property
  - Acquire vacant land or promote open space uses in developing watersheds to control increases in runoff
  - Pass an ordinance to incorporate additional zoning classifications into flood zones within each municipality.
  - Increase floodplain standards within municipal ordinances and include provisions for enforcing best practice standards by requiring a minimum freeboard of 2' to align with NY State Standards.
  - Continue development application reviews by County Planning Board to reduce risky development practices.
- **Reduce vulnerability to the Hazard:**
  - Harden structures and infrastructure (wet and dry-floodproofing)
  - Provide redundancy for critical functions and infrastructure
  - Adopt appropriate regulatory standards such as cumulative substantial improvement/damage, freeboard, lower substantial damage threshold, compensatory storage.
  - Stormwater management regulations and master planning.

| FLOOD          |                 |   |
|----------------|-----------------|---|
| Personal Scale | Corporate Scale | Government Scale  |
|                |                 | <ul style="list-style-type: none"> <li>○ Adopt "no-adverse impact" floodplain management policies that strive to not increase the flood risk on down-stream communities.</li> <li>○ Participate in the Community Rating System (CRS)</li> <li>○ Implement as-built regulatory requirements</li> <li>○ Implement site review ordinances/requirements</li> <li>○ Establish stream maintenance programs with stakeholders (e.g. Soil and Water Conservation District) - support county leads of such efforts</li> <li>○ Incorporate retrofitting/replacement of critical facilities and infrastructure in Capital Improvement Plans (CIPs)</li> <li>○ Promote the use of vegetation/plants as green erosion control measures to reduce localized flooding.</li> <li>○ Work with the SWCD to address removal of debris, log jams, etc. in flood vulnerable stream sections</li> <li>● <b>Increase Capability:</b> <ul style="list-style-type: none"> <li>○ Produce better Hazard maps, and improve access to flood Hazard mapping</li> <li>○ Capture/survey "high-water" marks during flood events.</li> <li>○ Provide technical information and guidance on appropriate mitigation options available to businesses and homeowners</li> <li>○ Enact tools to help manage development in Hazard areas (stronger controls, tax incentives, information)</li> <li>○ Establish an additional layer of zoning within flood Hazard areas (Cicero as an example)</li> <li>○ Develop strategy to take advantage of post disaster opportunities</li> <li>○ Improve compliance with and enforcement of the NFIP</li> <li>○ Develop mitigation partnerships with regional stakeholders (i.e.: CNY RPDB)</li> <li>○ Join Community Rating System (CRS) program, or improve level of participation in CRS</li> <li>○ Develop and implement a public information strategy for flood Hazard awareness, flood insurance (NFIP) and mitigation</li> <li>○ Maintain existing data as well as gather new data needed to define risks and vulnerability.</li> <li>○ Create a building and elevation inventory of structures in the floodplain</li> <li>○ Identify flood prone areas that may be in need of new flood studies</li> </ul> </li> </ul> |

| FLOOD          |                 |  |
|----------------|-----------------|--|
| Personal Scale | Corporate Scale | Government Scale   |
|                |                 | <ul style="list-style-type: none"> <li>○ Establish a program to identify and educate owners of flood-prone properties of potential mitigation options (e.g. elevations, relocations)</li> <li>○ Charge a Hazard mitigation fee on all new permits to create a Hazard mitigation funding source for initiatives or grant cost share requirements.</li> <li>○ Integrate floodplain management policies into other planning mechanisms within the planning area.</li> <li>○ Establish a Stormwater Utility to deal with urban drainage/flooding issues</li> <li>○ Establish incentives to promote flood Hazard mitigation of private property (e.g. permit fee waivers).</li> <li>○ Adopt ordinances/standards for cumulative damages and/or improvements</li> <li>○ Upgrade NFIP Floodplain ordinance, as well as other ordinances to current or above current standards.</li> <li>○ Develop and adopt a COOP</li> <li>○ Join "Storm Ready" Program</li> <li>○ Participate in county and regional training programs</li> <li>○ Provide additional training/certification to NFIP floodplain administrators and code officials.</li> <li>○ Implement annual training to account for high turnover of municipal officials.</li> <li>○ Maintain and enhance flood forecasting ability, including the establishment and maintenance of critical stream gages</li> <li>○ Promote awareness and participation in alert systems such as NY Alert</li> <li>○ Support and participate in regional flood management efforts, such as the Flood Mitigation Task Force or similar efforts</li> <li>○ Support and implement Hazard disclosure for the sale/re-sale of property in identified risk zones.</li> <li>○ Provide continued and enhanced training for emergency responders</li> <li>○ Establish a revolving "bank" or budget line item to fund grant application support</li> </ul> |

## GROUND FAILURE

### Personal Scale

- **Manipulate the Hazard:**
  - None
- **Reduce exposure to the hazard:**
  - None
- **Reduce vulnerability to the hazard:**
  - None
- **Increase Capability**

None

### Corporate Scale

- **Manipulate the Hazard:**
  - None
- **Reduce exposure to the hazard:**
  - None
- **Reduce vulnerability to the hazard:**
  - None
- **Increase Capability:**

None

### Government Scale

- **Manipulate the Hazard:**
  - None
- **Reduce exposure to the hazard:**
  - Consider hazard areas in land-use planning, zoning and development siting
  - Acquire structures in highest hazard areas (demolish and convert to restricted open space)
  - Relocation of Structures
  - Open Space Preservation
- **Reduce vulnerability to the hazard:**
  - Consider hazard areas in land-use planning and development siting
  - Build structures in land subsidence areas on piers anchored to bedrock
  - Stabilize vulnerable slopes near structures and infrastructure.
  - Work with stakeholders such as USGS and SWCD to develop appropriate risk reduction strategies.
- **Increase Capability:**
  - Increase understanding of hazard areas (e.g. Landslide Susceptibility Maps) - geotechnical surveys, LIDAR and mapping
  - Work with stakeholders such as USGS, NYS - Geological Survey

DRAFT

## HARMFUL ALGAL BLOOM (HAB)

| Personal Scale  | Corporate Scale  | Government Scale   |
|---|--|--|
| <ul style="list-style-type: none"> <li>● <b>Manipulate the Hazard:</b> <ul style="list-style-type: none"> <li>○ None</li> </ul> </li> <li>● <b>Reduce exposure to the Hazard:</b> <ul style="list-style-type: none"> <li>○ Comply with harmful algal bloom rules and regulations to minimize the exposure to HAB.</li> </ul> </li> <li>● <b>Reduce vulnerability to the Hazard:</b> <ul style="list-style-type: none"> <li>○ Form citizen action groups to promote awareness and best practices on local levels.</li> </ul> </li> <li>● <b>Increase Capability:</b> <ul style="list-style-type: none"> <li>○ Regularly check the NYSDEC HAB Notifications Page for information regarding</li> </ul> </li> </ul> | <ul style="list-style-type: none"> <li>● <b>Manipulate the Hazard:</b> <ul style="list-style-type: none"> <li>○ Increase permeable pavement to decrease surface runoff and water contamination.</li> </ul> </li> <li>● <b>Reduce exposure to the Hazard:</b> <ul style="list-style-type: none"> <li>○ None</li> </ul> </li> <li>● <b>Reduce vulnerability to the Hazard:</b> <ul style="list-style-type: none"> <li>○ None</li> </ul> </li> <li>● <b>Increase Capability:</b> <ul style="list-style-type: none"> <li>○ Build and maintain partnerships with other stakeholders to coordinate information sharing, and response for Harmful Algal Bloom events throughout the county/region.</li> </ul> </li> </ul> | <ul style="list-style-type: none"> <li>● <b>Manipulate the Hazard:</b> <ul style="list-style-type: none"> <li>○ None</li> </ul> </li> <li>● <b>Reduce exposure to the Hazard:</b> <ul style="list-style-type: none"> <li>○ Create/disseminate planting guides which explain Harmful Algal Bloom safety both recreationally and for drinking water purposes.</li> </ul> </li> <li>● <b>Reduce vulnerability to the Hazard:</b> <ul style="list-style-type: none"> <li>○ Pass municipal ordinances to enforce best practices for invasive species at the local level.</li> </ul> </li> <li>● <b>Increase Capability:</b> <ul style="list-style-type: none"> <li>○ Build and maintain partnerships with other stakeholders to coordinate information sharing, and response for Harmful Algal Bloom throughout the county/region.</li> <li>○ Work with federal/state agencies to disseminate information to local municipalities regarding Harmful Algal Bloom</li> <li>○ Disseminate information to the general public to educate them on Harmful Algal Bloom</li> <li>○ Work with stakeholders to identify and expand resources for prevention and early detection of Harmful Algal Bloom</li> </ul> </li> </ul> |

Note: Harmful Algal Bloom is a new hazard to the 2020 Update

## INVASIVE SPECIES

### Personal Scale

- **Manipulate the Hazard:**
  - Participate in quarantine, control, or eradication programs.
- **Reduce exposure to the hazard:**
  - None
- **Reduce vulnerability to the hazard:**
  - Form citizen action groups to promote awareness and best practices on local levels.
- **Increase Capability**
  - Regularly check the NYSISRI Portal for updated information.
  - Comply with Invasive Species rules and regulations to minimize the chance for invasive species to spread.
  - " Broaden collaborations focused on ecosystem restoration and ecosystem-based management. "

### Corporate Scale

- **Manipulate the Hazard:**
  - None
- **Reduce exposure to the hazard:**
  - None
- **Reduce vulnerability to the hazard:**
  - None
- **Increase Capability:**

Build and maintain partnerships with other stakeholders to coordinate information sharing, and response for Invasive Species throughout the county/region.

### Government Scale

- **Manipulate the Hazard:**
  - Work with Federal/State agencies on quarantine, control, or eradication programs for invasive species.
- **Reduce exposure to the hazard:**
  - Create/disseminate planting guides which explain which types of plants and vegetation are safe to plant within the county.
- **Reduce vulnerability to the hazard:**
  - Pass municipal ordinances to enforce best practices for invasive species at the local level.
- **Increase Capability:**
  - Build and maintain partnerships with other stakeholders to coordinate information sharing, and response for Invasive Species throughout the county/region.
  - Work with federal/state agencies to disseminate information to local municipalities regarding Invasive Species from the NYS Invasive Species Research Institute portal.
  - Disseminate information to the general public to educate them on Invasive Species

| INVASIVE SPECIES |                 |   |
|------------------|-----------------|---|
| Personal Scale   | Corporate Scale | Government Scale  |
|                  |                 | <ul style="list-style-type: none"><li>○ Work with stakeholders to identify and expand resources for prevention and early detection of invasive species.</li><li>○ Support New York State's initiative for an invasive species early warning system.</li><li>○ Broaden collaborations focused on ecosystem restoration and ecosystem-based management." Build ecological restoration planning into IS management projects.</li></ul> <p>Support New York State's marketing, branding, and educational initiatives.</p> |

DRAFT

## SEVERE STORMS

### Personal Scale

- **Manipulate the Hazard:**
  - None
- **Reduce exposure to the Hazard:**
  - None
- **Reduce vulnerability to the Hazard:**
  - Retrofit structures (improved roofing, installing storm shutters, etc.)
  - Provide for redundant heat and power
  - Contact municipality or utilities to trim or remove trees that could affect power lines
  - Plant appropriate trees near home and power lines ("Right tree, right place" National Arbor Day Foundation Program.
- **Increase Capability:**
  - Regularly check the NYSDEC HAB Notifications Page for information regarding
  - Improve awareness of impending severe weather (e.g. joining NY Alert, obtain a NOAA weather radio)
  - Promote 72-hour self-sufficiency
  - Provide for redundant heat and power

### Corporate Scale

- **Manipulate the Hazard:**
  - None
- **Reduce exposure to the Hazard:**
  - None
- **Reduce vulnerability to the Hazard:**
  - Relocate critical infrastructure, such as power lines, underground
  - Reinforce or relocate critical infrastructure such as powerlines so that it meets performance expectations.
- **Increase Capability:**
  - Contact municipality or utilities to trim or remove trees that could affect power lines
  - Create redundancy (e.g. backup generators)
  - Improve awareness of impending severe weather (e.g. joining NY Alert, obtain a NOAA weather radio)
  - Develop a Continuity of Operations Plan (COOP)
  - Monitor impending storm events so that you can release employees in such a manner as to not negatively impact emergency response personnel/services.
  - During power outages, utility companies to assign staff to work with county and local highway departments.

### Government Scale

- **Manipulate the Hazard:**
  - None
- **Reduce exposure to the Hazard:**
  - None
- **Reduce vulnerability to the Hazard:**
  - Harden infrastructure such as locating utilities underground.
  - Trimming trees back from power lines
  - Designate evacuation routes and strengthen critical road sections and bridges.
  - Adopt ordinances that regulate the type and quantity of trees planted near utility lines
  - Relocate critical infrastructure, such as power lines, underground
- **Increase Capability:**
  - Implement a program that proactively manages problem areas by use of selective removal of Hazardous trees, tree replacement, etc.
  - Enforce building codes that require all roofs to withstand snow loads.
  - Increase communication alternatives
  - Modify land use and environmental regulations to support vegetation management activities that improve reliability in utility corridors.
  - Modify landscape and other ordinances to encourage appropriate planting near overhead power, cable, and phone lines
  - Promote awareness and participation in alert systems such as NY Alert
  - Provide NOAA weather radios to the public
  - Create/Enhance "mutual aid" agreements for response to all emergencies
  - Create/identify evacuation routes to be utilized during severe storm events.
  - Develop debris management plans.
  - Join "Storm-Ready" program
  - Provide early warning of impending severe storm events to identified critical or essential facilities. This would include facilities such as large employments centers, schools, hospitals
  - Promote emergency power supplies to private property.

| SEVERE STORMS  |                 |  |
|----------------|-----------------|--|
| Personal Scale | Corporate Scale | Government Scale   |
|                |                 | <ul style="list-style-type: none"><li>○ Improve, expand or harden communications facilities and services</li><li>○ Recruit additional emergency personnel or use mutual aid agreements</li><li>○ Increase sheltering capabilities</li><li>○ Increase capability to respond to power outages and downed power lines. Establish partnerships with utility providers through pro-active planning.</li></ul> |

DRAFT

## SEVERE WINTER STORM

### Personal Scale

- **Manipulate the Hazard:**
  - None
- **Reduce exposure to the Hazard:**
  - Plant appropriate trees near home and power lines ("Right tree, right place" National Arbor Day Foundation)
- **Reduce vulnerability to the Hazard:**
  - Insulate House to provide greater thermal efficiency and reduce heat loss.
  - Provide redundant heat and power
  - Insulate Structure
  - Ensure natural gas input/release valves do not get covered in snow
- **Increase Capability:**
  - Trim or remove trees that could affect power lines
  - Prepare emergency food and supplies to be self-sufficient for at least 72 hours in the event of a severe winter storm.
  - Be aware of inclement weather conditions and move your vehicles off of the street as severe weather systems approach.
  - Retrofit structures

### Corporate Scale

- **Manipulate the Hazard:**
  - None
- **Reduce exposure to the Hazard:**
  - None
- **Reduce vulnerability to the Hazard:**
  - Relocate critical infrastructure, such as power lines, underground
  - Reinforce or relocate critical infrastructure such as powerlines so that it meets performance expectations.
  - Install tree wire
- **Increase Capability:**
  - Trim or remove trees that could affect power lines
  - Create redundancy in utilities and communications
  - Develop a Continuity of Operations Plan (COOP) to address operations before, during and after coastal storm events.
  - Utilize weather radios at the workplace to keep your employees aware of severe weather conditions.

### Government Scale

- **Manipulate the Hazard:**
  - None
- **Reduce exposure to the Hazard:**
  - None
- **Reduce vulnerability to the Hazard:**
  - Harden infrastructure such as locating utilities underground where appropriate.
  - Trimming trees back from power lines
  - Designate snow routes and strengthen critical road sections and bridges.
  - Adopt codes and regulations that address the issues of parking of vehicles along roadways during severe weather events.
  - Develop or enhance the capacity/capability of stormwater conveyance systems.
  - Provide backup power sources at vital critical facilities.
- **Increase Capability:**
  - Support programs such as "Tree Watch" that proactively manage problem areas by use of selective removal of Hazardous trees, tree replacement, etc.
  - Establish and enforce building codes that require all roofs to withstand snow loads-- Develop/Improve/Enforce building Codes in Hazard Areas
  - Increase communication alternatives
  - Modify land use and environmental regulations to support vegetation management activities that improve reliability in utility corridors.
  - Modify landscape and other ordinances to encourage appropriate planting near overhead power, cable, and phone lines
  - Provide weather radios to vulnerable populations
  - Enhance public awareness campaigns to address those issues of alert and warning and actions to take during severe weather events.
  - Utilize the best available technology to enhance the warning systems for all severe weather events (i.e.: tornado warning systems).
  - Coordinate severe weather warning capabilities and the dissemination of warning amongst those

**SEVERE WINTER STORM**

DRAFT

## WILDFIRE

### Personal Scale

- **Manipulate the Hazard:**
  - Clear potential fuels on property; dry overgrown underbrush; diseased trees
- **Reduce exposure to the hazard:**
  - Clean and maintain defensible space around structures
  - Locate outside hazard area
  - Mow regularly
- **Reduce vulnerability to the hazard:**
  - Create and maintain defensible space around structures, provide water on site.
  - Use fire-retardant building materials
  - Create defensible spaces around your home.
- **Increase Capability:**
  - Employ Firewise techniques to safeguard your home
  - Identify alternative water supply points proximate to your home such as swimming pools, lakes, streams
  - Support your local fire department
  - Be aware of weather conditions that support/enhance the probability of wildfires

### Corporate Scale

- **Manipulate the Hazard:**
  - None
- **Reduce exposure to the hazard:**
  - None
- **Reduce vulnerability to the hazard:**
  - Create and maintain defensible space around structure and infrastructure and provide water onsite
  - Use fire-retardant building materials
  - Provide stored water to be utilized for firefighting with appropriate fire department connections at facilities not equipped with fire hydrants or inadequate fire hydrant spacing
- **Increase Capability:**
  - Support Firewise community initiatives

### Government Scale

- **Manipulate the Hazard:**
  - None
- **Reduce exposure to the hazard:**
  - Clear fuels (dry underbrush, diseased trees) on land that can trigger and maintain wildfires
  - Implement Best Management Practices on public lands
- **Reduce vulnerability to the hazard:**
  - Create and maintain defensible space around structure and infrastructure
  - Higher regulatory standards
  - Establish water main supply and hydrants in areas without hydrants
  - Decrease hydrant spacing
- **Increase Capability:**
  - More public outreach and education efforts including an active "Firewise" program
  - Identify fire response and alternative evacuation routes
  - Seek alternative water supplies in urban wildland interface areas.
  - Become a "Firewise" community
  - Increase capability to fight wildfires utilizing equipment that can support wildfire fighting such as: tankers, engines with "pump-and-run" capabilities, dump tanks for tanker shuttle operations.
  - Develop/implement wildfire management plans.
  - Establish Mutual Aid Agreements with the Tender Task Force
  - Develop a Water Supply Plan
